DETAILED ACTION

1. This action is responsive to the applicant's preliminary amendment filed on 03/26/2008.
2. Claim 1 has been amended.
3. Claims 2-20 have been cancelled.
4. Claim 1 is being allowed.

Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance:

Prior art Wygodny et al. (US 6,282,701 B1) taken either singly and/or in combination with other cited prior arts, do not subtract the minimized call tree data structure for the second build of the computer program from the minimized call tree data structure of the second computer program to thereby generate a subtracted minimized call tree data structure, wherein subtracting the minimized call tree data structure for the second build from the minimized call tree data structure for the first build to generate a subtracted minimized call tree data structure further comprises copying the minimized call tree data structure for the first build and walking the minimized call tree data structure for the second build over the minimized call tree data structure for the first build to generate the subtracted minimized call tree data structure, wherein walking the minimized call tree data structure for the second build over the minimized call tree data structure for the first build further comprises: for each that exists in both the minimized call tree data structure for the first build and the minimized call tree data structure for the second build, generating a node in the subtracted minimized call tree data structure by subtracting a minimum base value of the node in the minimized call tree data structure for the second build

from a minimum base value of a corresponding node in the minimized call tree data structure for the first build; and for each node that exists in only one of the minimized call tree data structure for the first build and the minimized call tree data structure for the second build, creating a node in the subtracted minimized call tree data structure having a negative minimum base value corresponding to a minimum base value of the node that exists in either of the minimized call tree data structure for the first build or the minimized call tree data structure for the second build; and outputting the subtracted minimized call tree data structure; and inputting the trace data to an arcflow tool, wherein the arcflow tool generates the plurality of call tree data structures for each of the first and second builds of the computer program based on the trace data, as recited in such manners in each of independent claim 1.

Prior arts of record do not teach and/or suggest these claimed limitations, thus, claim 1 is allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
